# Installing a Network Printer in Windows 10

This document details the steps needed to install a printer using the Windows 10 operating system. Before installing a printer, you must make sure you are connected to the same network as the printer you want to connect to through either a network cable or a wireless connection.
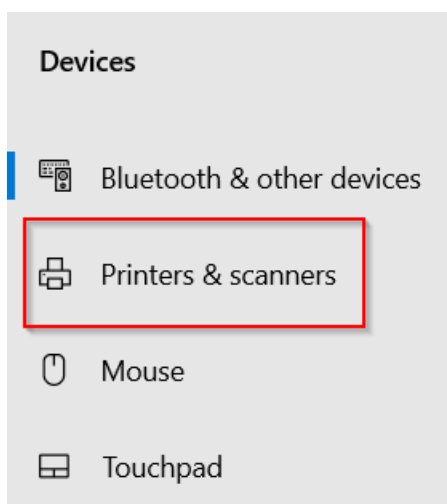

1. Click on the Start button and then click Settings

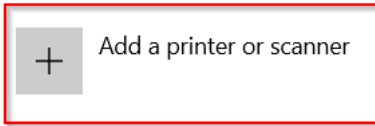

2. Click Devices

3. Click Printers & Scanners from the options on the left

4. Click Add a printer or scanner
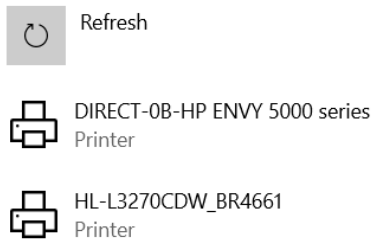

Printers & scanners

Add printers & scanners

5. The system will search for available printers on your network and list any it finds
